

FRIENDS OF WOODMAN POINT RECREATION CAMP [INC]

13th January 2016. FIRE THREATENS THE WOODMAN POINT RECREATION CAMP

A fire started at Woodman Point in the vicinity of the Boat Storage Shed, at around 10.30 pm on Wednesday, the 13th January 2016. Apparently, deliberately lit, the fire, then fanned by strong easterly winds, ignited the unique bush that surrounds the DSR Camp, and soon the ferocious blaze, threatened the historic heritage listed buildings, and caused the Camp to be evacuated of all persons because of the extreme emergency. There were no injuries sustained during the crisis, and luckily, no damage was caused to any of the DSR Camp buildings apart from some minor water and smoke damage. Lucky, is really not the word to describe the outcome.
